

## Lifting Equipments:-

- Hydraulic Trolley Jacks

**MEGA** 

### Characteristics

This display facilitates the combined presentation of both bottle and trolley jacks.

Can be completely dismantled.

- Weight: 41 kg.

## - T-2

## Characteristics

The ergonomic handle with rubber grip allows for easier handling from any position.

The models under 6t are fitted with polyamide wheels. These wheels will not damage garage floors, do not rust and are quiet in operation.

Optimum use and distribution of material thanks to the rear side openings and front side reinforcements. Lighter yet stronger.

Easily accessible thanks to a very low chassis on 2-ton models (135 mm at their highest point).

- 75 mm at the highest point of elevation on the T2.
