

- Plate Compactor

-POWER TROWELS

JCF Power Trowels incorporate the following handy features to speed completion of projects and maintain uptime.

Wide pitch control range of 0~15 degrees which can be adjusted during operation of equipment; centrifugal clutch pulley automatically adjusts for belt stretch; and blade pitch control and drive components are heat treated and rust resistant for extra long life.

You can complete the job of trowel easily and economically in shorter period of time with less man power, as it has 36" working diameter.

- Simple and strong structure**
- Folder handle type**
- Safety belt guard protects operators against injure.**
- Turning level changes trowel pitch with machines in motion.**
- Low profile and centre of gravity provide excellent balance & better stability.**

*** Feature**

Blade tilt and throttle control, all mounted for operator convenience.

Sealed base and tilting mechanism.

Wide handles with adjustable height control ensures maximum operator comfort.

One piece gear box housing for low maintenance.

*** Specification**

Model	JFA-36
Size L*W*H (mm)	1730*1000*960 (1000) (1060)
Weight (kg)	74
Handle Length (mm)	1300
Working Diameter (mm)	914 (36")
Blade RPM	50 ~ 100
Engine	5~6 HP
Fuel	Gasoline

POWER TROWEL

TPT-36 is designed and built for easy rapid finishing and is suitable for trowelling granolithic, dusted and color slabs. It is very convenient with durability and high performance to use at the job site to make big parking lot and large flat floor for commercial & industrial purpose.
